

MUSIC LEARNING THEORY (MLT)

How we learn when we learn music

- Based on an extensive body of research and practical field testing by Edwin E. Gordon and others, Music Learning Theory is a comprehensive method for teaching **audiation**, Gordon's term for the ability to think music in the mind with understanding.
- MLT establishes sequential curricular goals in accord with their own teaching styles and beliefs.

Dr. Edwin Gordon

The primary objective is development of students' tonal and rhythm audiation.

Through audiation students are able to draw greater meaning from the music they listen to, perform, improvise, and compose

"Initial music learning, like initial language learning, is informal, yet sequential." (Gordon)

Stages of Audiation

- *Stage 1-* momentary retention
- *Stage 2-* imitating and audiating tonal patterns and rhythm patterns and recognizing and identifying a tonal center and macrobeats
- *Stage 3-* establishing objective or subjective tonality and meter
- *Stage 4-* retaining in audiation tonal patterns and rhythm patterns that have been organized
- *Stage 5-* recalling tonal patterns and rhythm patterns organized and audiated in other pieces of music
- *Stage 6-* anticipating and predicting tonal patterns and rhythm patterns

Jump Right In: The General Music Series...

- - Is based on how children learn music, rather than how it has always been taught
- - Can be used with ease by teachers of any methodological background
- - Allows teachers to adapt all lessons to meet the needs of individual children
- - Conforms to the National Standards - Includes comprehensive lesson plans for each song and activity

- Focuses on helping children learn to audiate and become independent, creative musicians
- Incorporates outstanding folk repertoire from all over the world

Music Learning Theory has many characteristics in common with such rote-first methods as Suzuki, Dalcroze, Kodaly, and Orff

Chant the patterns notated above using rhythm syllables. After students sing the song, give each of them a student book and show them what the patterns look like in the notation of the song on page 50. Explain

Preparing Audiation

Major Tonality (Usual Duple Meter)

Minor Tonality (Usual Triple Meter)

It is crucial to perform songs in various tonalities and modes

MLT PHILOSOPHY FOR AUDIATION

Teaching Procedure

**Separation of
Tonal
and Rhythm Content**

**Teaching to
Students'
Individual Differences**

**Importance of
Individual
Performance**

Separation of Tonal and Rhythm Content

Gordon's research indicates that children have difficulty conserving the tonal and rhythmic characteristics of music. For this reason, tonal and rhythm content are kept separate in learning sequence activities. Tonal patterns are performed without rhythm and rhythm patterns are performed without pitch.

TONAL UNIT 3 SECTION B CRITERION 1

Grade _____ Teacher _____ Date _____ Test _____

Sing tonal sequence in D major using tonal syllables.
Sing class patterns in D major using tonal syllables.

Teacher sings pattern using tonal syllables.
Students sing any other tonic and/or dominant pattern in major in improvisatory response using tonal syllables.

Major E M D

Seating/Evaluation Chart

Teaching to Students' Individual Differences

During learning sequence activities all students are taught patterns that are easy to audiate. Students of average aptitude also learn patterns of medium difficulty, while high aptitude students learn easy, medium, and difficult patterns.

RHYTHM UNIT 4 SECTION C CRITERION 1

Grade _____ Teacher _____ Date _____ Test _____

Chant rhythm sequence in usual triple using rhythm syllables.
Chant class patterns in usual triple using rhythm syllables.

Teacher chants patterns using rhythm syllables.
Students chant patterns using rhythm syllables.

Usual triple E M D

Seating/Evaluation Chart

Importance of Individual Performance

Music Learning Theory tells us that individual performance is essential for the development of audiation. Too often, students who never perform by themselves learn only to *imitate* music rather than audiate it.

In learning sequence activities it is essential for each student to perform patterns in solo and to hear other students do the same.
